

presents:

QFS

Quantum-Financial-System

NEW-International Monetary System(IMS)

NO Cryptocurrency!!!

NO Blockchain technology!!!

GESARA

The global prosperity agenda

209 countries

... sign the Paris Agreement

and are therefore **GESARA** compliant.

Of course, not all participants in the 2017 climate summit were aware of exactly what they were doing, when they signed.

2

QFS

The Quantum Financial System is the
New International Monetary System (IMS)
on the basis of a quantum consciousness (QC)

ASSED-BACKET-CURRENCY

is the world's new digital

CURRENCY PLATFORM

for all nations.

QFS – CHECK MATE:

Of financial slavery

With the PROCLAMATION OF GESARA and the official launch of the QFS. The alliance will demolish the Central Banking System (FED) that aims to power the world economy, to put the world population in eternal debt slavery, and will completely destroy it.

The little-known truth is that the QFS has been running in parallel for more than a year next to the central bank system. This was a smart move by the Alliance. Thereby many cabal bankers have been caught red-handed with illegal money transfers and subsequently arrested.

The "OFF WORLD TECHNOLOGY" of this system immediately recognized the intentions of the user and was able to report the attempted fraud in real time. Also a reason which is why it was never possible to hack this system.

The so-called "ALLIANCE" also "WHITE HATS" is the "New Military Global Alliance". It was created for the liberation of mankind from slavery that has reigned for 6,000 years and embodies a coalition of representatives of various galactic alliances and "earth-based forces".

WWG1WGA

OFF-WORLD-TECHNOLOGY

The ALLIANZ supplies us with this higher-dimensional connected Cutting-edge technology a quantum computer based on a quantum consciousness.

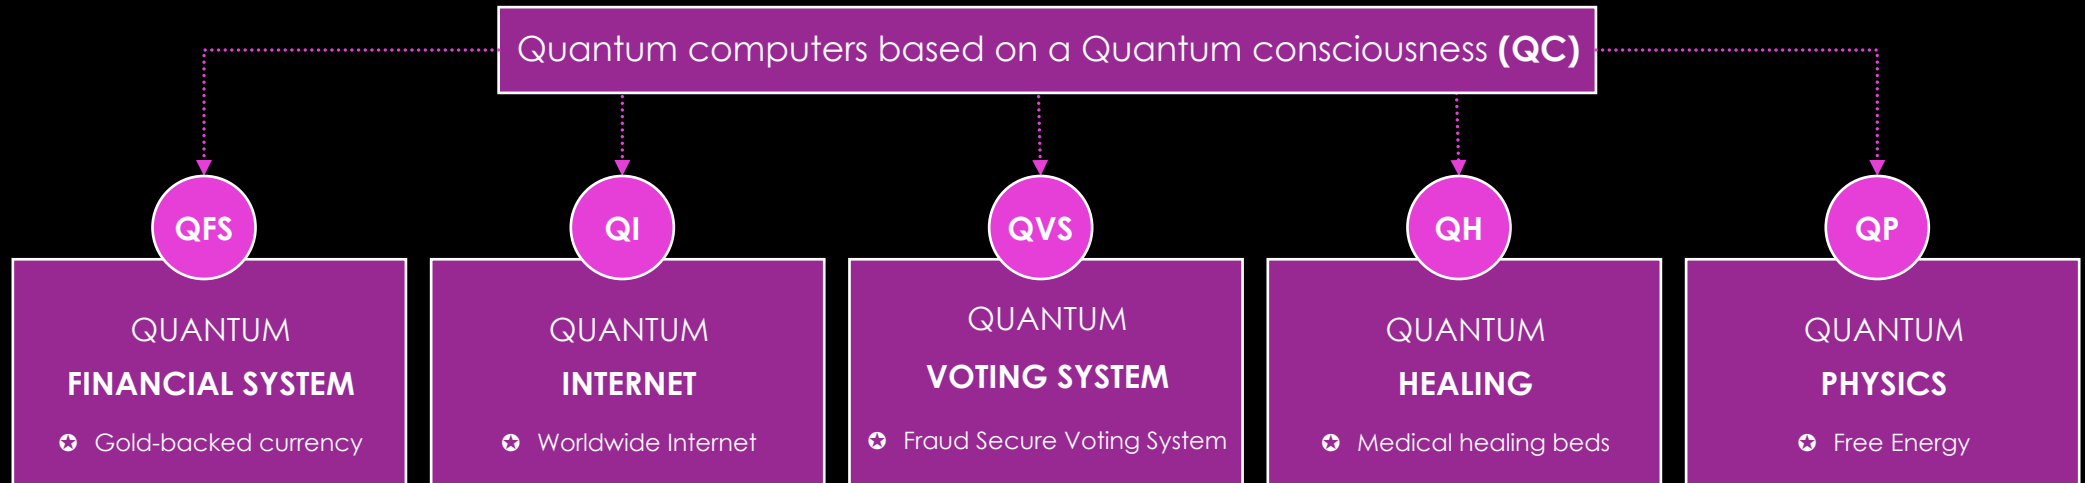

NOTE: It is NOT an artificial Intelligence!

NO cryptocurrency or blockchain technology!!!

GESARA

207 countries are now realizing the global bit by bit prosperity program

GESARA: The most important cornerstones

About history

The basis was a class action lawsuit brought by the former senior US Military Roy Schwasinger, was prodded and put forward. 336,000 plaintiffs and around \$6 trillion was pending. All the facts became known thanks to the support of former and still active high-ranking military officials, as well as some CIA employees. The court explained the Federal Reserve and hence all actions in this regard were executed to be unlawful. This was the first to produce the National Economic Reform and Security Act (NESARA).

However, since the illegal Federal Reserve Act of 1913, for the entire world it became GESARA. G stands for Global. That is not the point only about a completely new financial architecture for the benefit of the citizens, but also about a security architecture that guarantees world peace. GESARA has already been 2017 under the leadership of President Donald Trump in the climate protection agreement installed in Paris and signed by all.

✦ World peace will be established

209 countries are returning to their original form of government because the Corporate governments and thus their alliances (WHO, EU, NATO etc.) will be smashed. The US ended their decades-long Military actions that led to the destabilization of different parts of the world. All Nuclear weapons will be destroyed forever.

☆ Introduction of the QFS

In the first step, the currencies are reset (GVR). Every country gets its national currency back. Every currency is backed by gold and other precious metals. Each country is governed by clearly defined economic and social formulas rated (RV). Fixed and thus immovable exchange rates are introduced. This means the end of FIAT money and the artificially created financial bubble. The QFS creates and protects an impenetrable financial privacy. Germany returns to the D-Mark.

☆ Return to natural and constitutional law

People are going back to natural law/human law and are therewith fully sovereign citizens. This also includes the ban of the trading in birth certificates, which corporate governments use to raise capital to stay liquid. Humans were declared dead, lawless corpses (missing at sea). All courts, sweep back to constitutional law and become "legitimate" judges and lawyers.

☆ New social structures

The sovereign countries return to their original and legitimate borders. New elections will be held within 120 days of the proclamation of GESARA in every country. All political parties are dissolved. There are only direct candidates for each office/parliament. Each may only serve for one electoral term a social exercise office. The parliaments are thus reduced to a tenth of the original size. The new elections will be held worldwide by the new quantum voting system (QVS) monitored. This system running through the Quantum Consciousness (QC), was already used in the "Trump election". It is able, without exception, to immediately detect any attempted fraud.

✧ Prosperity for all

Abolition of all artificially generated and therefore illegal taxes such as income tax, property tax, all energy taxes. That ended the FED system of private national banks with their affiliates, corporate governments. There remains only a new uniform worldwide Sales tax of 14% (as of 12/21) for the new acquisition of Goods belonging to the core business (e.g. houses, cars). Food and medicine etc. are tax-free. The revenue from this national tax is used for entertainment of future newly elected parliaments. Shrinking of the financial authorities, which in future will only have the task of paying the new national sales tax monitor. Refund of all unlawfully withheld taxes (details to be announced).

Cancellation of all credit card, mortgage and other debts, bank debts due to the illegal government and banking activities explained above. Increasing the benefits for older people. Permanently high basic income for everyone (details to be announced). Large sum for humanitarian purposes. Everyone has the right to a free apartment or a free house.

✧ Release of 6,000 patents

GESARA secures the release of over 6,000 patents for new technologies. In addition include, for example: MedBeds for the complete recovery of people, Quantum computers, quantum phones, free energy according to Nicola Tesla, Anti-gravity vehicles for locomotion without fossil fuels, replicators for your own production of food (no artificial food!) and all things based on their natural energy frequency, new forms of fast and environmentally friendly travel over long distances, flying cars and much more.

8

Quantum Financial System

with „Off-World-Technology (QC)“

The new QFS has no comparison to anything ever seen introduced on this planet. It offers a 100% financial security and transparency not only for the QFS. The entire monetary system of the world is going with this new technology. Switched easily and quickly to gold-based currencies using new technology. It also makes the centrally controlled interbank systems SWIFT and CIPS ineffective and unnecessary.

The Quantum Consciousness (QC) has unimaginable – for the human understanding not yet properly comprehensible – storage capacity. All existing worldwide Bank records, since the use of computers for accounting systems, have been recorded by QC. It works like a cloud. Any software is compatible and allows free applications for everyone in the future worldwide. Your personal files, photos but also other storage devices can be used and connected without any problems.

In the near future everyone will be able to log in directly via their own personal account to connect to the Quantum Internet (QI). Internet Service Providers are no longer needed. Neither viruses, worms, artificial intelligence or other destructive garbage will "plague" you any more because the QC is a "benevolent gatekeeper".

QFS – THE FIRST STEPS

01

GCR – Currency conversion

CONVERSION

All booked FIAT currencies of each account holder, which are available at the time of the Implementation of the QFS system will be considered "legal" on a one-to-one basis. Base (parity) exchanged into gold-backed national currencies. The procedure is referred to as the "reconciliation process".

02

Digital Security Marking

MARK

QFS accounts for all assets and "digital currencies" in each bank account in the world, a trackable, digital security marker. This "**QUANTUM QUBIT**" ensures that every transaction is legal, intended by the owner and is transparent. It serves to verify the authenticity of the entire process.

03

RV – National Reassessment

REVALUATION

FORMULA: The basic assets, i.e. the economy of each country, its population - as an asset of the country - and determine a number of other parameters, the value of the national currency. This calculation is applied to each of the 209 countries. After that, all currencies in each country have the same face value.

THE GOLD PRICE BECOMES IRRELEVANT!!! once the price of gold through these three Steps is fixed, it becomes irrelevant as there are fluctuations in the price of gold equivalent to the value of all currencies. So there is none. Net change in face value of all currencies. There is a lot on our earth, more gold than is needed to mine the gold of all world currencies. No matter what gold prices the commodity market dictates, the market price for gold will not affect currency values. This move also eliminates inflation or deflation in our world and the use of gold as a "commodity".

The digital gold asset certificate “Quantum Qubit”

DIGITAL GOLD ASSET CERTIFICATE:

CERTIFICATION

Only gold or asset backed currencies that have a digital gold or asset certificate (quantum qubit) can be transmitted via the QFS. The certificate refers to the serial number of a piece of gold or an Asset held in reserve/quarantine to increase currency to back up.

QC - OFF-WORLD TECHNOLOGY:

QUARANTINE

The physical gold and/or assets used to back currency used are put under “reserve/quarantine”, so to speak. There is no way it was stolen or out of the secure vaults that hold it.

Therefore, the currency is called "GOLD CURRENCY" or. All 209 GESARA compliant sovereign countries have their own asset-backed currency ready for launch and it will be introduced piece by piece in each country. Germany returns to the Deutschmark. References to “investment-hedged currencies” are the process during the introduction of a currency based on assets of the country of origin.

YOUR PERSONAL

QFS-ACCOUNT (Distributed Ledger)

With GESARA and the return to natural law/human rights, everyone is human, only responsible and accountable to itself. Therefore all QFS account holders have "sovereign status". Your very personal QFS account already exists. At the moment he's right there with me connected to your bank account. So you regulate all financial transactions in advance as usual through your previous bank. **QFS IS FREE FOR EVERYONE.**

All BANKS temporarily have an intermediate function with the QFS ACCOUNT'S, the account holder. In the future, however, every person will have direct access to their own quantum computer. Banks are then no longer necessary and will have to rediscover themselves in their tasks.

NOTE: Quantum phones are expected to become global after the "Event". Available to everyone free of charge.

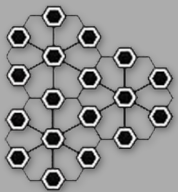

QFS 
ACCOUNT

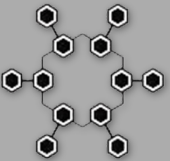

DISTRIBUTED-LEDGER-TECHNOLOGIE (DLT)

QFS-ACCOUNT # XXX-XX-XXXX

100% TRANSPARENCY

Distributed

Decentralised

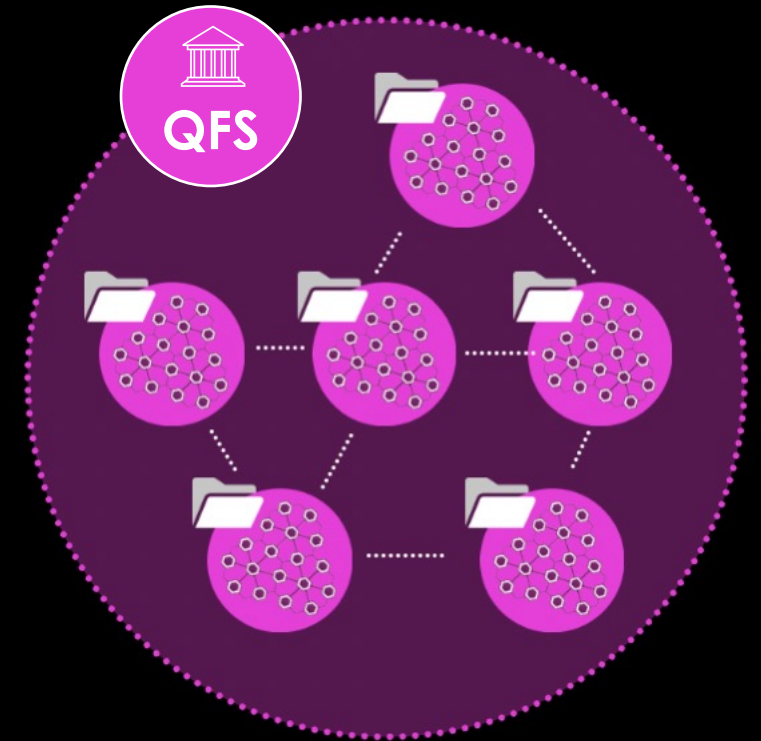

Centralised (FIAT)

Distributed-Ledger-Technology (DLT)

DLT supports the completely decentralized architecture of the QFS. Figuratively speaking each sovereign country has its own ledger. In this are all relevant Information about banks, citizens and their truthfulness and rights saved.

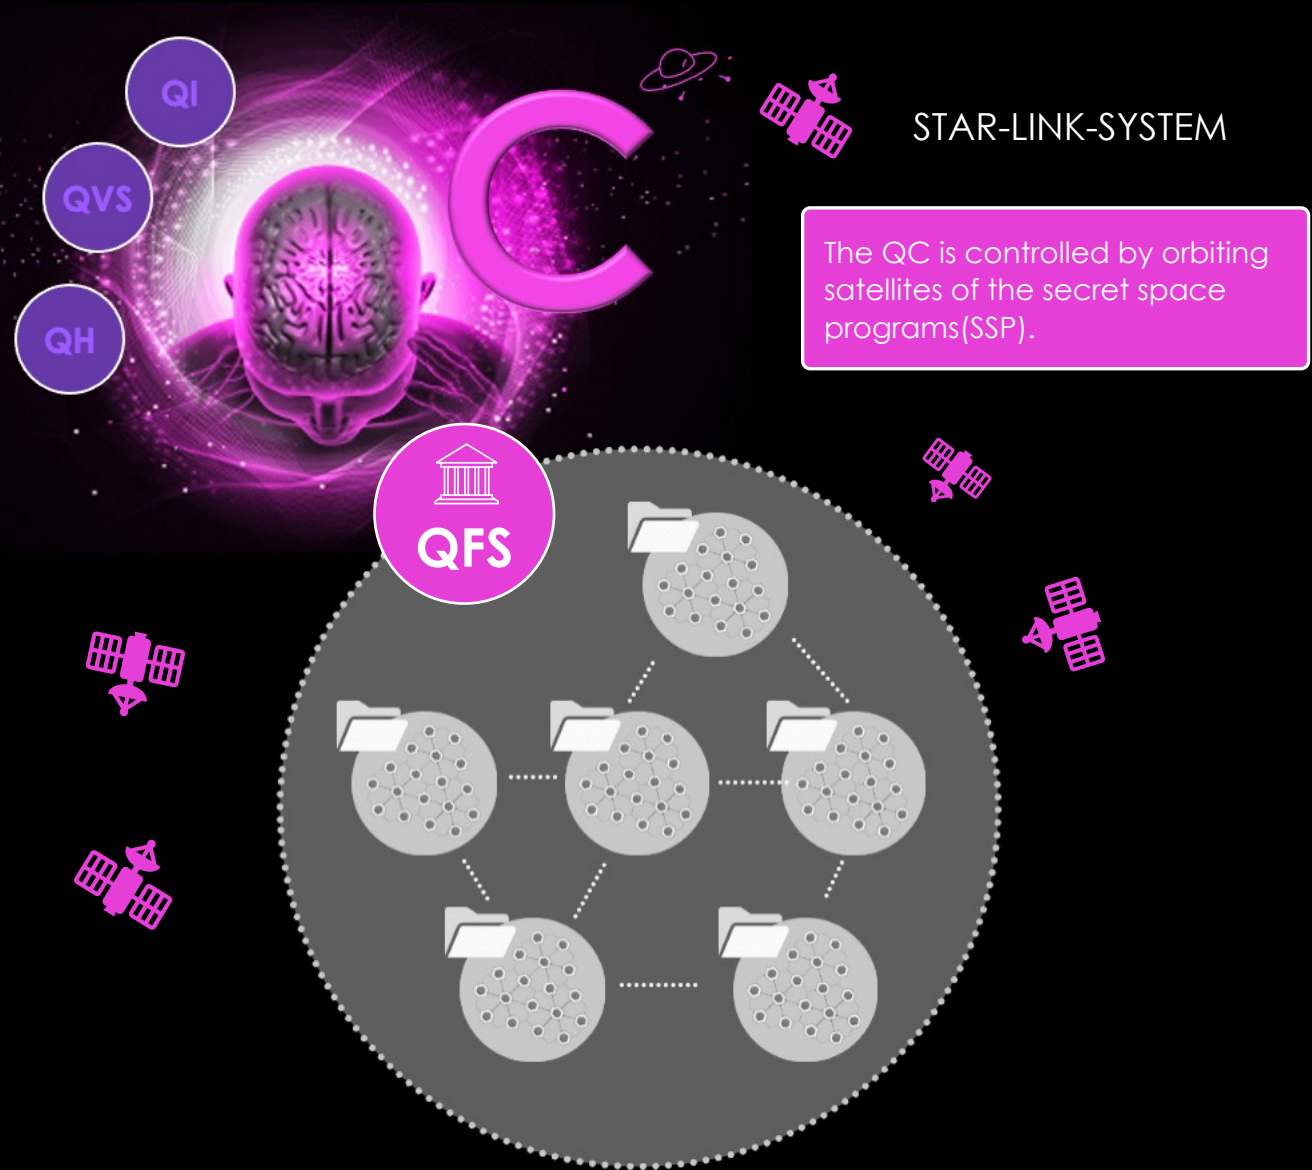

When you later find out about the soon-to-be quantum computers or phones you log in, the system recognizes whether it is the real account holder. For example, if you make a transfer to another sovereign country, so the two "country ledgers" get in touch with each other. The Payee is checked for authenticity and then receives the Credit amount in real time. This technology offers 100% transparency.

DLT is **NOT** a cryptocurrency or blockchain technology!

The Quantum Consciousness (QC) and thus also the QFS is part of the surveillance of the secret space program. This will be a form of targeted, but not oppressive control over transactions.

Quantum qubits "interact" with every financial transaction anywhere in the financial world, to ensure that each transaction is legal, intended by the owner and is transparent.

... for everyone who wants to know more about

✦ Currency Exchange Systems

These systems facilitate the free exchange of ACC and GL tokens. Of the Exchange consists of a "Digital Asset Interchange Object System" with global "node". Every digital currency is backed by an SDR (Standard Drawing Rights) supports and represents the most important token on the exchange. It is interchangeable with tokens of the ledger of each international node included in the stock exchange is held.

✦ Asset Collection Chain (ACC)

ACC is a distributed general ledger token or tool that gives each entity a specific asset (e.g. a gold bar) and each currency, a assigns a digital tracking number and a unique ID code. ACC is a tool to digitize assets for global applications and distribution.

✦ General Ledger (GL)

GL is the SDR (Sovereign Drawing Rights), which is a "national" currency for the established national circulation. QFS only supports hosted currencies up to 100 % are asset-backed, based on assets within the country of origin. Fixed assets determine the amount of currency tokens attached to be issued to each of the 209 sovereign nations.

✦ Token

A "token" is a unique sequence of "digital" numbers that refer to, for example refers to a unit of 1 gram of 99.99 pure gold. Where did it go, when was it registered, who sent it and which account received it, everything will be monitored in real time.

NWO -fantasies

At this point it is important to dispel many doubters' fears of the QFS and GESARA to take and show the difference to the Deep State plans. There were of course spread tons of fake news. The Plan of the New World order (NWO) of the World Economic Forum has already been definitively destroyed.

Here is the NWO fantasy plan: The financial system of the NWO would have "Slaves", a centrally controlled new account that exclusively uses digital money. Basis would be a supposedly "unconditional?" basic income. The planned "transhuman beings" would then have to spend money according to what the taste of the rulers would be. At the same time all forms of penalties have been automatically settled from this account.

The NWO slave would be completely transparent via the Darknet and be absolutely controllable. We would be completely de-humanized. This horror scenario is thanks to the alliance now history.

ERDE 2.0 TECHNOLOGY-OUTLOOK

Replicator spaceships

Floating cars

Replicator food

Holographic computers

Quantum phone

ERDE 2.0

Technologies of the future – explained in a way that is easy to understand. Soon also as a presentation available.

Levitating cars powered by plasma generators; On crystal technology based medical healing beds of the 3rd generation; Holographic replicators for spaceships or even for completely organic, nutritious food and drink; Quantum computers and phones. All this is within reach and no "Deep State Fake" to mislead you. But we don't just want you all bringing closer the wonderful gifts of our future. It awaits us very much. A lot of new things to explore, learn and spread.

A lot of new things to explore, learn and spread. According to our motto: KNOWLEDGE CREATES AWARENESS - we are looking for "Co-Creative fellow campaigners" - by the people for the people - programmers, administrators, Graphic designers, journalists, IT specialists, translators and, and, and. We don't expect any education or credentials – just passion and awareness of your potential and talents. In short: Everything you do should be from the heart Have fun. (Brief introduction to: mitmachen@volksnetzwerk.de)

Everyone finds a form of networking and communal sharing. With the following bank details we comply with the wishes of all those who contact us in repeatedly asked for their numerous feedbacks to express their gratitude, Appreciation and support of our work in the form of an energy balance for to be able to express. Gratitude is one of the highest vibrations in the universe. **We thank you from the bottom of our hearts!**
